

# CINETIC

The style is the deepest form of identity. All that reflects the congruence and a noble consistency is recognised through a style and a technique. The stylistic identity produces the language. Cinetic becomes a moderate presence with its own colors and minimal motifs.

This discretion makes it simple to be used.

## TECHNICAL FEATURES

Animalier has three products inside its range:

Daim (AN111 to AN316) is the result of an innovative experiment that allows to create a 3D product, using a non woven surface completely covered with velvet, on which the designs are laser-engraved subsequently. Lights from above will ensure an optimal yield of this product that is even scratch resistant and washable. Cuoio (AN321 to AN628): employs the same technique used to realize Daim, but with a different kind of material it is possible to reproduce the effect of the leather engraved, usually exploited in fashion, to realize accessories and bags. A unique solution that appears on the wallcovering's market for the first time ever. Chamois (AN731 to AN738): is created for all those who appreciate the eco-leather effect, but prefer essential and simple textures to obtain a more minimal final result.
